

FIVE EXPLORERS HEADED FOR POLE

Peary, Wellman, Harrison,
Mikkelsen, and Erickson
All Seek Honors.

TO SEND WORD THIS YEAR

Two of the Americans May Be Heard
From Within Eight
Weeks.

NEW YORK, July 24.—Of the five exploration parties now out, teams are definitely trying for the North Pole and reports of their attempts for the current year are expected within eight weeks.

Peary has not been heard from since he sailed out of North Sydney, Nova Scotia, just a year ago. By the middle of September the Peary Arctic Club looks for word from him.

Walter Wellman, if his dirigible balloons stands the tests, may start from Spitzbergen in August, and as he assumes his aerial voyage will be over in ten days, the result of his efforts for 1906 will be known about as soon as Peary's.

These are the parties now within the Arctic Circle:—
Peary, American; sailed July 26, 1905, from North Sydney in the steamship Roosevelt in an endeavor to make Lady Franklin Bay and thence by sledge the North Pole.

Wellman, American; at present at Spitzbergen preparing for the construction and test of a balloon which is designed to take him to the pole in from 22 to 110 hours.

A. H. Harrison, English; set out July, 1905, from Mackenzie river to winter in Banks Land and explore Beaufort sea. Was at Herschel Island and later at Messers. Mikkelsen (American) and Leffingwell (English) started May 29 from Mackenzie river in search of new Arctic land.

In addition to these, Mylius Erickson (Danish) will leave Copenhagen next week to explore the northeast coast of Greenland and try to reach the pole with auto-sledges.

Look for Great Achievement.
"Peary is fifty years old and no longer in his prime vigor," remarked Dr. Hurlburt, librarian of the American Geographical Society, yesterday. "This is his last polar voyage and he, on that account, set out on the most determined attempt of his career. We have high hopes of a remarkable achievement."

"In September a cable dispatch is expected from him from a telegraph station at South Labrador. Should no news come from him then, it will be evidence that he requires another year to complete his work. No doubt, in that event, he will have started some Eskimos south with a message where he will winter on the north side of Grant Land. This message should arrive in the United States in November."

Dr. Hurlburt regards the Peary expedition as the most promising of all, because Peary knows so well what the difficulties are and how to prepare for them.

Peary never has come home without altering a map or bringing new scientific data, records of geology and ethnological specimens. He started without expecting too much of himself, but eager as ever. He took a crew of twenty for the steamship Roosevelt, also took Eskimos and two hundred dogs. Capt. R. A. Bartlett, Navigator George A. Wardwell, John Murphy, and Dr. Olaus Wolf were his staff.

Wellman intends to prepare with care, and as his balloon will in itself be an experiment his trip will be a test of the designer's promises and seems capable of taking him where he wants to go. His is the most picturesque "dash to the pole" now attempted, for besides the dirigible balloon, which even in the favorable latitude he will keep for two hours, he will carry motor sledges.

Wellman's plan resembles Andre's ill-fated one, but has the advantage of improved knowledge of aerodynamics and better application of motive power. Andre, starting from Dane Island for his flight, "hoped to sight Continental land at Behring straits and be able to reach San Francisco." He figured, like Wellman, on a speed of twelve to fifteen miles an hour, and that the pole could be reached in six days at the most.

Word From Harrison.
Mikkelsen and Leffingwell's schooner, the Duchess of Bedford, was expected to enter Behring sea about August 1. Thence she would sail down the Alaskan coast and establish a depot at Princess Royal Island, west coast of British Columbia, for the coming winter.

Next summer she would proceed back through Behring straits to the Siberian coast, and leave the party with 140 days' provisions, to march west-northwest in search of new land and to make soundings through cracks to learn the configuration of the sea's bottom. The schooner Duchess of Bedford, coming home to refit, will meet them at Wrangel Island in 1908.

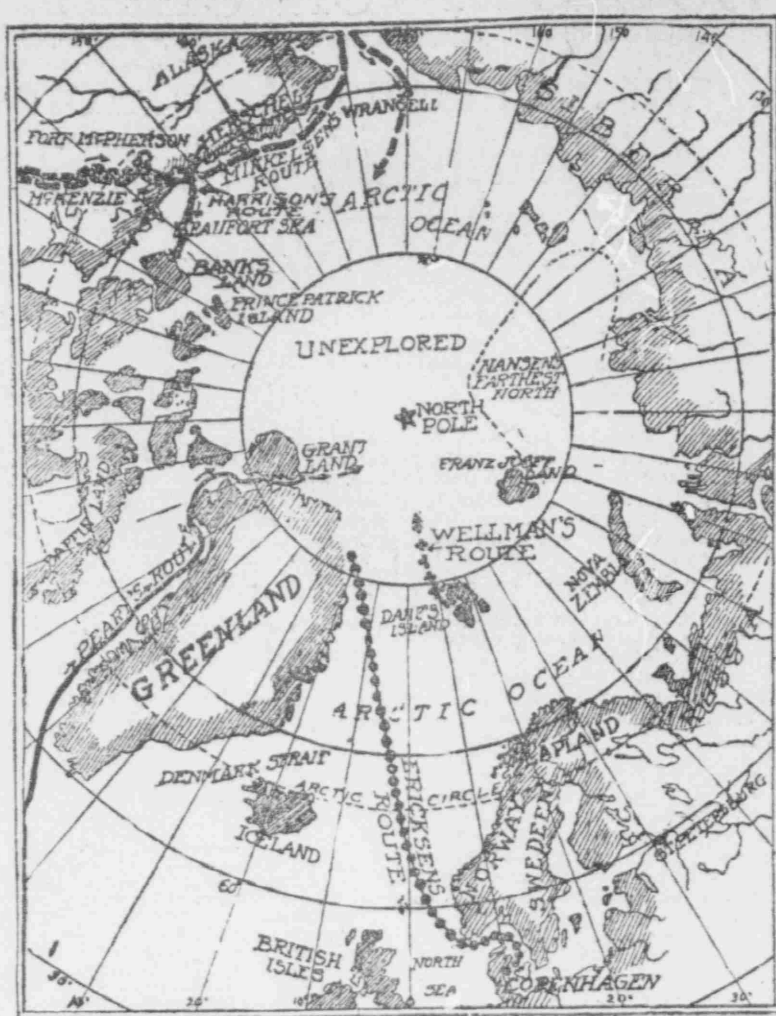

News of Dr. Harrison has lately been received by the American Geographical Society. He writes that he left Athabasca Landing, in Athabasca province, Canada, July 22 last year, in a boat built to transport his supplies. He reached Arctic Red river October 4, and then spent last winter, "making a short survey with perambulator, prism compass and sextant." Then he went to the Peel river and down that to Fort McPherson. Last February, leaving food behind, he went on to Herschel Island, where he met Captain Amundsen's crew. This winter Dr. Harrison is to spend on Herschel Island, and next year explore the Beaufort sea and Parry archipelago.

Geological exploration, according to the geologists, is not much more perilous nowadays than tropical exploration. Only one life was lost on the celebrated voyage of the Discovery to the Antarctic, and the several recent voyages in the Arctic have cost no lives at all.

RETIRED CIRCUS HORSE
CAN'T HELP WALTZING
NEW YORK, July 24.—"For the good of the service," as they say in the police department, Jerry, the waltzing ambulance horse, who has long bothered the Bellevue Hospital surgeons and drivers by his antics, today was transferred to Fordham Hospital, the Bronx branch of the institution.

Jerry used to be a circus horse. When he goes on a call, old habits return to him and his capers disturb the surgeons and the patients in the ambulance. Music of any kind from the street piano to a brass band, is sure to stop him on a hurry call and start him prancing. It is hoped the long runs in the upper Bronx will cure him.

Wears 414 Fragments From Skins of Others

Unprecedented Case of Skin-Grafting—Kilby
Would Have Died If Kinfolk and Friends
Had Not Borne Pain.

NEW YORK, July 24.—More than two-thirds of his body was severely burned by an explosion of a small alcohol lamp nearly three months ago, but George S. Kilby, thirty-seven years old, of 35 Gates avenue, Brooklyn, upon whose body 414 pieces of skin had been grafted, was pronounced cured yesterday.

According to Dr. Herbert C. Allen, of 336 Claremont avenue, this is an unprecedented case in skin-grafting. It was only made possible by a great number of Kilby's friends, who volunteered to save his life.

Daughter's Sacrifice.
Among the first to offer themselves were little Lucia B. Kilby, twelve years old, daughter of the afflicted man, and his father, George F. Kilby. While the child was being flayed she willingly told the surgeon that she suffered no pain, and that she was willing to stand the torture to save her dad. The child was on the operating table several times.

Kilby, employed by a firm in Washington Market for eighteen years, went on May 8 into his bathroom to shave. He filled a small lamp with alcohol, but the match set fire to an old can on the floor. An explosion followed. Stunned, he lay there for some minutes, and as his balloon will in itself be an experiment his trip will be a test of the designer's promises and seems capable of taking him where he wants to go.

His wife saw him wrasp in flames. Mrs. Kilby and her mother put out the blaze. Kilby, with raw fortitude, told his mother-in-law how to put out the flames in the bathroom. Dr. Allen declared that the chance of recovery was about two or one hundred, and that the injured man to the hospital in so desperate a case, he said, the only chance was in patching up the

There is real enjoyment in chewing SCHNAPPS tobacco. That's why it has won millions of chewers every year, until now more is sold than all similar tobaccos.

SCHNAPPS, the most popular product of the Reynolds factories, is manufactured in the very heart of the Piedmont tobacco belt, known to the world as producing tobacco with an aroma so delightful and appetizing that it introduced and popularized the chewing of tobacco.

There is only one genuine SCHNAPPS. Be sure the letters on the tag, and under the tag, spell S-c-h-n-a-p-p-s. There are more pounds of SCHNAPPS chewed every year than the total amount of all similar kinds.

Internal revenue statistics show that SCHNAPPS and others of the Reynolds brands won enough chewers in one fiscal year to make a net gain of six and a quarter million pounds, or one-third of the entire increased consumption in the United States on chewing and smoking tobacco.

SCHNAPPS is made and sold everywhere in 5c. cuts and 10 and 15c. plugs.

Only choice selections of thoroughly cured leaf are used in SCHNAPPS, and expert tests prove that this class of tobacco requires and takes a smaller amount of sweetening than any other kind of tobacco grown—and that it has a wholesome, stimulating and satisfying effect on chewers, besides being the most economical.

OUTING DOWN RIVER FOR POOR CHILDREN

Five Hundred to Be Guests
of Navy Yard Officers
and Men.

MOTHERS GOING ALONG, TOO

Ice Cream, Peanuts, Cake, and Lemonade All Free for Youngsters.

Next Thursday's outing to River View when 500 children and mothers who have no other vacation through the summer, and seldom, if ever, leave home, promises a good deal of pleasure to the children who are being treated through the kindness of the navy yard men.

The employees of the navy yard are sparing neither work nor money to make the entertainment complete in every way. The special committee has made all plans for a box lunch, ice cream, peanuts, lemonade, boat tickets, car tickets, amusements and competitive games. They have asked the summer outings committee, with the help of the Associated Charities' agents, to furnish the children most needing a change and rest of this kind, leaving entirely to these agents the selection of beneficiaries.

Play Many Games.

The program of the games follows: Tug of war for boys ten to fourteen years of age, two from each section, each member of the winning side to receive half glove.

Tug of war for girls of same age, two girls from each section; prize, parasol for each winner.

Twenty-five-yard race—Boys six to eight years, two from each section, the first two boys to receive ball and bat.

Twenty-five-yard race—Girls six to eight, two girls from each section, the first two girls receive some prize.

Obstacle race for boys eight to ten, as many as please to enter, excepting those who have been selected for some other event, prize for first two a straw hat.

Potato race for girls eight to ten, two girls from each section, first and second get prize.

Ball game, sides to be furnished by agents, prizes for winning side.

All to Carry Flags.
Each child will be presented with an American flag when going on the boat.

This part of the program will be in charge of Samuel E. Shreve, chairman of the entertainment committee.

The committee considers itself particularly fortunate in having the full co-operation and help in its undertaking of Capt. E. H. C. Luetze, commandant of the navy yard. The other officers and men have come forward with appropriate assistance and wish good luck to this unselfish effort.

By vote of the committee at its last meeting, all supplies and material purchased for the day, which are not disposed of for the benefit of those present, will be contributed to "Camp Good Will."

The committee of navy yard men appointed to take charge of arrangements for the day are:

G. W. Price, chairman; A. J. Berres, vice chairman; J. L. Yoekel, secretary; Samuel Paake, treasurer; E. G. Laed, William Crump, John C. Cross, S. D. Cole, H. T. LeClair, David Thomas, C. T. Smith, R. W. Bowen, Samuel Shreve, J. Walter Edelin, Frank G. DeGroot.

BOY TAKES CARBOLIC ACID.
While his mother was absent from the bedroom yesterday evening, Ernest Walker, colored, eight years old, picked up a bottle filled with carbolic acid and began drinking its contents.

The boy was terribly burned about the mouth and chest and screamed in agony until his suffering was alleviated at the Casualty Hospital. He was later sent home and is out of danger.

BAPTIZE HUSBANDS AFTER BIG HUNT

Prophet Crowdy's Spinsters
Win Battle For the
Benedicts.

PICNIC GIVEN CONVERTS

Dressed in Lavender Robes and White Wings Dusky Saints in Christ Initiate New Members.

PHILADELPHIA, July 24.—Great was the joy in Prophet Crowdy's Zion yesterday.

Tabernacle No. 1, the cornerstone of Zion, at 1404½ Pitwater street, was closed up tight in the morning, and a notice on the door informed the unknown that the Saints in Christ were over in Jersey a baptizing. They were receiving into the fold of the Church of God those converts who came by matrimonial persuasion, the husbands who were captured by the daughters of Zion in obedience to the prophetic command of Crowdy.

In Prophet Crowdy's command to his unmarried female followers that they should get themselves men within the space of the week it was not specified that these husbands should be of the faith of the Saints.

Indeed, this would have been impossible, as the colored women greatly outnumber the men in the Crowdy Church. But if the word one be a Gentile he must be converted at the same time he is married, hence the induction into membership of a score or more men yesterday. Others will be baptized next Sunday.

Lunch Baskets With Them.
The ceremony took place on the banks of a little creek at Cramer Hill, over in Jersey. The evangelists, the elders and the songsters, as the choir is styled, went over in the True Chariot of Light, a red and white bus, emblazoned with religious mottoes, drawn by the sturdy horses which on week days are attached to the Church of God express wagon.

Lavender robes, with purple wings, were stowed away under the seats to be taken out and donned when the saints assembled on the banks of the baptismal stream.

They had lunch baskets with them too, for the ceremonial feast.

No one in Zion seems to know just how many of the women of the congregation have got husbands. One elder estimated that fifty have been married in the last week, and another thought there might be seventy-five. No official record of the marriages is kept, and no licenses are taken out, because the Saints do not believe in heeding any laws other than their own. Seven Keys, which don't provide for the civil formalities which usually attend such functions.

Law Doesn't Bother Them.
According to the laws of Pennsylvania, about nine out of ten pairs of the Saints are bigamists, but that doesn't bother them, just so Crowdy is satisfied.

Crowdy is their prophet, the captain of the Lord's hosts; they know it because he says so, and his word is all-sufficient law for them.

Last night there was a lovefeast and feet-washing in the tabernacle, at 1404½ Pitwater street. Those who were dipped in the pleasant water of the little creek over in Jersey in the forenoon were then first initiated in the solemn ceremonies of the feet-washing and saintly hugging and kissing, which are a part of the creed.

SNEAK THIEVES GET JEWELRY.
Gerrin Cerrone, of 38 Decatur street, reports to the police that his home was entered by sneak thieves last night and valuable jewelry stolen. The robbers are said to have taken a lady's gold watch and chain, valued at \$25, small gold chain, heart brooch set with diamonds, a gold hair pin, and a small amount of money. No arrests have yet been made.

STOP STAMMERING!

PROF. E. L. RIVENBUSH
Of Chicago, Who Makes a Specialty of Curing STUTTERING, STAMMERING, and all forms of speech impediments, is now in Washington at Room 20, ARIZONA HOTEL, 310 G St. N. W.

LETTERS FROM PROMINENT VIRGINIANS
Alexandria, Va., July 20, 1906.
Dr. E. L. RIVENBUSH,
310 G Street N. W.,
Washington, D. C.

Dear Doctor: I have no hesitancy whatever in recommending to the public your method for the cure of stammering and stuttering. I believe it to be a method which, if carefully followed, will cure the worst case of stammering and stuttering. The cure already effected upon Mr. Jos. F. Warner, a member of my church, is sufficient to recommend your method to the public, but particularly to those afflicted in their speech.

Your method of treatment as explained to me yesterday, and the demonstration of it before me with your class convinced me that no one need have trouble with speech if they would place themselves under your care and follow your method. Very truly,
Rev. J. A. JEFFERS,
Pastor of Trinity M. E. Church, Alexandria, Va.

Alexandria, Va., July 20, 1906.
Dr. E. L. RIVENBUSH,
Dear Sir: I certainly feel very happy to-day, for, after being under your valued instructions for a week, I am now able to speak and read fluently by your method or art.

I have been a stammerer for many years, and have tried others to get cured, but have not found such help as I have found while with you this week.

I commend your method very highly to those who may have this awful affliction of stammering, and hope I may have the opportunity of telling these afflicted persons of this noble method of Dr. Rivenbush.

I remain, very truly,
JOSEPH F. WARDER.
No MEDICINES GIVEN OR SURGICAL OPERATION REQUIRED.
I WARRANT TO CURE the worst case of Stammering in from one to four weeks' time. 9 years' practice and thousands of cures effected.
